

The **history** and the **future** of fiber optics are both right here

OFS Specialty Photonics Division | Avon, CT | Somerset, NJ | Broendby, Denmark

A Furukawa Company

From erbium-doped fiber and HCS® fiber to the latest developments in high-power laser transmission, and tunable dispersion compensation . . .

We design, draw, and cable fiber; we connectorize the ends; and we create devices to help you better use and manage optical fiber solutions in your application.

We're Everywhere in September

CIOE - Shenzhen, China

ECOC - Berlin, Germany

Frontiers in Optics - San Jose, CA

. . . and AVFOP in Victoria, BC in October
